# KBG UI/UX

– Focused on a Command Palette or Spotlight Search like quick search menu.
– Through this UI component you can interact with arbitrary "actions." Actions have a generic interface and can be added to the workspace in combinations to modify the UI/UX.
    – Some Actions can only be allowed globally once per workspace, while other actions can occur multiple times.
– Some example actions:
    – Edit Options
    – Filter Nodes
    – Search Nodes
